Website evaluation checklist

Instructions:

- **Step 1:** Use the provided checklist to evaluate each of the three websites.
- **Step 2:** Take notes on the strengths and weaknesses of each site based on the criteria.
- **Step 3:** After evaluating, suggest 2-3 simple changes that could improve the UX/UI of each website. These could be changes in design, navigation, speed optimization, or mobile responsiveness.

Expectations:

- A brief evaluation of each website based on the checklist.
- Suggested improvements for each website to enhance user experience and design.

1. AirBnB		
Visual Design	**Yes or No**	**Comments**
Is the design visually appealing and professional?	☑ ~~Yes~~ ☐ No	The Airbnb website is clean, clear and easy for the audience to understand, the website is easy to navigate due to the modern interface with a focus on imagery and simplicity of what it offers for the audience.
Are the colours well-chosen and consistent throughout?	☑ ~~Yes~~ ☐ No	The colours of the website are well chosen; they have neutral tones and consistent branding enhances calmness and trust for the audience.
Is the typography readable (font size, font type)?	☑ ~~Yes~~ ☐ No	It’s readable, the layout is consistent and doesn't bring about confusion, it uses sans-serif font with good hierarchy and spacing.
Is there good use of whitespace to avoid clutter?	☑ ~~Yes~~ ☐ No	The whitespace has balanced spacing between images, text, and menus, clutter is avoided tremendously well.
Navigation		

Is the navigation intuitive and easy to follow?	☑ ~~Yes~~ ☐ No	Search and filtering are simple and user-centered.
Are the menus organised logically?	☑ ~~Yes~~ ☐ No	Clear categorisation by 'Stays,' 'Experiences,' and 'Online.'
Are important links easy to find (Home, Contact, etc.)?	☑ ~~Yes~~ ☐ No	All major sections accessible from the homepage
Is there a search function, and does it work well?	☑ ~~Yes~~ ☐ No	Smart, predictive search with location and date filters, it works very well.
Mobile Responsiveness		
Does the website display correctly on mobile devices?	☑ ~~Yes~~ ☐ No	Scales seamlessly to mobile with responsive images.
Is the layout adaptive to different screen sizes?	☑ ~~Yes~~ ☐ No	Excellent adaptive design on tablets and phones.
Are buttons and links easy to tap on mobile?	☑ ~~Yes~~ ☐ No	Large, touch-friendly elements enhance usability
Loading Speed		
Does the site load quickly?	☑ ~~Yes~~ ☐ No	Pages load fast but images slightly delay on mobile data.
Are images and videos optimised for faster loading times?	☐ Yes ☑ ~~No~~	Some large images affect loading speed
User Experience (UX)		
Is the purpose of the website clear within seconds of landing?	☑ ~~Yes~~ ☐ No	Purpose instantly clear—booking stays and experiences.

Can users complete tasks (finding information, purchasing products, etc.) easily?	☑ ~~Yes~~ ☐ No	Straightforward booking and payment flow.
Are there any distractions (pop-ups, autoplay videos) that hinder the user experience?	☐ Yes ☑ ~~No~~	Minimal pop-ups; smooth browsing.
Is the website accessible for users with disabilities (alt text, clear headings, keyboard navigation)?	☐ Yes ☑ ~~No~~	Needs stronger alt-text and ARIA labels for accessibility
Call-to-Action (CTA)		
Are the CTAs (e.g., Buy Now, Subscribe) clear and compelling?	☑ ~~Yes~~ ☐ No	'Book Now' and 'Explore Stays' stand out effectively.
Is there a good balance of CTAs on each page?	☑ ~~Yes~~ ☐ No	Strategically placed without overwhelming users.
Are buttons visually distinct and easy to click?	☑ ~~Yes~~ ☐ No	High-contrast buttons improve visibility.
Suggestions for Airbnb.	1. Optimize image file sizes for faster mobile loading.	
	2. Add comprehensive alt-text for accessibility compliance.	
	3. Introduce collapsible filter categories for	

easier navigation.

2. CNN		
Visual Design	**Yes or No**	**Comments**
Is the design visually appealing and professional?	☑ ~~Yes~~ ☐ No	Bold and authoritative, but visually dense
Are the colours well-chosen and consistent throughout?	☐ Yes ☑ ~~No~~	Strong red branding sometimes overpowers content.
Is the typography readable (font size, font type)?	☑ ~~Yes~~ ☐ No	Readable but crowded on small screens.
Is there good use of whitespace to avoid clutter?	☐ Yes ☑ ~~No~~	Cluttered layout reduces readability.
Navigation		
Is the navigation intuitive and easy to follow?	☑ ~~Yes~~ ☐ No	Main categories are clear and clickable.
Are the menus organised logically?	☑ ~~Yes~~ ☐ No	Logical hierarchy by topic and region.
